

2026 CSCA Round 4 Supersprint

ONE Raceway Wakefield and Shelley Circuits –
Sunday, 14th June 2026

Hosted by Triumph Sports Owners Association,
NSW

Dear Competitor,

In a first for CSCA (or at least for as long as I can remember) TSOA NSW will be running a Supersprint on two separate circuits during the same day. We have all driven the Wakefield and Shelley Circuits at ONE Raceway before, but has anyone driven one direction for the first half of the day and then swapped to the other direction for the second half of the day? You now have the chance to do just that.

Therefore, from a timing and pointscore perspective, Round 4 will be run as two 'events' - 4A and 4B. The 'events' will be split at 3 runs a piece, for a total minimum of 6 runs on the day. We will commence the day with the Wakefield Circuit then switch to the Shelley Circuit at 1:30pm OR if all 6 groups have completed 3 runs - whichever comes first! Event 4A and 4B will each contribute half points towards the 2026 CSCA Pointscore to retain the same total number of points available to Competitors at a typical CSCA Round.

Entry is via Motorsport Australia Event Entry, which is accessed via the Member Portal on the homepage of the Motorsport Australia website [here](#). If you are new to Motorsport Australia Event Entry and need guidance please consult your club CSCA delegate. If you are not a member of a CSCA club and need help, please call me.

The preferred (& cheapest) payment method is via Direct Deposit into the club's bank a/c. Alternatively, payment can be made via Credit Card through the Motorsport Australia Event Entry (**NB:** this method will incur card charges). Please see the Supplementary Regulations for the full payment details.

Entries will be accepted as per the Supp Regs, Item 4. ALL information for your entry including your vehicle class and lap times to help place you in the appropriate running group comes from the MA Event Entry system.

This information should be updated in 'Event Entry' under 'MY CARS' prior to placing your entry. These details will help us allocate you into an appropriate group so any errors will affect your placement.

Please note that a lot of competition numbers are reserved and paid for each year by CSCA competitors. If you do not have a reserved number it is recommended that you do so and that will be your number for any CSCA round from herein. To select and reserve a number click or ctrl/click here: [Allocated Numbers – CSCA](#) or if you are just wanting to know what numbers are already allocated and therefore not available for selection.

If you don't have one and the number you have chosen is not available we will try and allocate one close to the number you have requested. It is important that you advise alternative numbers or we will just pick one out of the hat.

Confirmation of entry will be via 3 emails. The first will be notification of your entry acceptance. The second will confirm your competition number. The third will confirm your running group, grid position, track layout and final details for the day. This email will be sent in the week leading to the event.

It is compulsory for all drivers to hold the appropriate current Motorsport Australia speed licence or higher **AND** to be a financial member of a Motorsport Australia affiliated Club. Licences will be checked online. **Club membership evidence will be checked at check-in on the day**, where competition numbers will be available for sale.

Please note: Electric Vehicles will not be accepted at this event.

Note: All vehicles and apparel must comply with Standard Requirements for Supersprints. All cars will be scrutineered at the track as detailed in the Supp Regs. Please make sure your car conforms to the regulations and noise limit. Final scrutineering details will be sent in the email sent out in the week before the event.

At One Raceway, the timing system uses MyLaps transponders. They now have exclusive rights to hire these and the cost of hiring is included in the entry fee.

Similarly to Round 2 at ONE Raceway **we will have an 'early bird' special of \$350 entry (incl Timer), expiring at the end of May (Sunday 31st).**

The break-even point for this event is high and so we will be opening this up to other clubs if we are unable to achieve breakeven entries over the next 3 weeks.

Noise is still a major issue at this track and **any car that exceeds this limit after ONE warning** will be excluded from any further participation. I would suggest that you run your road exhaust system if a road registered car and an extra muffler if a race car.

60 carports and 30 garages are free but cannot be reserved. 30 Pit lane car spaces (in 3 double and 24 single garages) can be hired for **\$95 per car** direct with ONE Raceway at: (Ctrl/Click or Click to access): <https://1racer.com/event/3e7b845c-2629-4205-ba85-9bbb126b14a4>

We look forward to receiving your entry and having fun getting the absolute most out of ONE Raceway!

Louis Anderson
Event Secretary
